ZYCOO

1 VI Series Network Intercom

Enable two-way communication in control rooms, machinery areas, and access-restricted points, supporting worker coordination and emergency response.

2 SH10 & SH30 Network Horn Speaker

High-SPL horn speaker for noisy production lines and open yards, ideal for safety alerts, shift change notifications, and long-distance paging.

3 SL30 Network Column Speaker

Offer clear voice penetration in shipping and receiving areas. Suitable for routine announcements and zone-based industrial paging.

4 IP Audio Center

Centralized audio control for factory-wide paging, scheduling, and automated announcements, suitable for single plants or multi-site industrial operations.

5 IP Audio Dispatch Console / Mobile App

Real-time dispatching for operators, offering live paging, zone control, and emergency message triggering from PC or mobile.

6 EA-B11 Call Button with Microphone

One-touch call button for production lines and warehouses, enabling quick assistance requests or emergency alerts to control rooms.

7 CooFone H4P

Works seamlessly with the IP Audio Dispatch Console/M100 for real-time monitoring, ensuring efficient communication across the production floor.
