

IP Audio Dispatch Console

v2.0.2 Release Notes

New Features:

1. Added a Refresh button to the Console interface.
2. Added dual date selection methods (manual input and calendar picker) in scheduled task settings.
3. Added Reset and Clear buttons to the calendar selection interface.

Improvements & Bug Fixes:

1. Optimized SIP registration logic for Console extensions. SIP connections are now properly closed upon logout or Console shutdown.
2. Optimized video call handling logic on the Console side to enhance stability.
3. Fixed an issue preventing operator login when the associated WebRTC extension was deleted.
