

ZYCOO IP Audio Endpoint Devices

Release Note

2026.10

Corresponding Version:

IPS-W1/IPS-C1/IPS-H1:v1.0.1

Improvements & Bug Fixes:

1. Optimized the scan interaction procedure for SAAD software compatibility.
2. ONVIF supports microphone audio encoding configuration.
3. ONVIF backchannel supports adaptive PCMU and PCMA.
4. ONVIF supports interaction over port 80.
5. Added the network-caching parameter for music playback.
6. Optimized multicast parameters to resolve incomplete audio playback.
7. Fixed the issue where temporary volume set via the VC-Z01 volume controller could not be restored.
8. Increased the length of the Remarks field.
9. Added ring timeout parameter configuration; default is 0 (never timeout).
10. Added a log download feature.
11. Optimized the amplifier control logic for local amplification on the IPS-W1-R1; the amplifier now turns off automatically when there is no audio output.
12. Fixed the translation error for "Wednesday" in the reboot schedule.
13. Changed the device name of IPS-W1/IPS-W1-R1 to "Network Wall Mount Speaker".
