

ZYCOO IP Audio Endpoint Devices

Release Note

2026.10

Corresponding Version:

IPS-M1-D2W/IPS-M1-D1W/IPS-M1-BW:v1.0.2

Improvements & Bug Fixes:

- 1.Optimized scanning interaction program to ensure compatibility with SAAD software.
- 2.Added microphone audio encoding configuration support for the Onvif protocol.
- 3.Added PCMU and PCMA adaptive support for Onvif backchannel.
- 4.Added port 80 interaction support for Onvif.
- 5.Added the network-caching parameter for music playback.
- 6.Optimized multicast function parameters to resolve incomplete audio playback issues.
- 7.Fixed an issue where the VC-Z01 volume controller could not restore the volume after setting a temporary volume.
- 8.Increased the length of the remarks/notes field.
- 9.Added configuration for the ring timeout parameter (default is 0, meaning never timeout).
- 10.Added the log download function.
- 11.Optimized timed task day-of-the-week options to allow days to be optional (no day-of-the-week judgment if left unset).
- 12.Optimized API interface URL invocation requests and added logging.
- 13.Fixed a bug in Onvif protocol relay control.
- 14.Fixed a bug in API interface flashing light control.
- 15.Added volume load limitations for different device models under various power supply modes.
